SUMMARY

Passionate Backend Developer focused on building scalable web applications and exploring emerging technologies. Experienced in developing applications across backend and frontend, with a strong interest in solving real-world problems.

EDUCATION

Mepco Schlenk Engineering College, Sivakasi Bachelor of Engineering in Computer Science Engineering CGPA: 7.99 (up to 4th semester)	2024-2028
AVM Marimuthu Nadar Hr Sec School, Sivakasi Higher Secondary Certificate (HSC) 90.33%	2023-2024

PROJECTS

Placement Preparation Platform (PPP) Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Socket.IO, Groq AI API - Identified fragmentation in student placement prep — scattered across multiple platforms for aptitude, core CS concepts, mock interviews, resume building, and peer networking. - Built a unified MERN platform consolidating aptitude problems, core CS learning modules, AI mock interviews, resume analysis, and community features in one app. - Implemented secure authentication (OAuth + JWT), developed REST APIs for user/dashboard/learning modules, integrated Socket.IO for real-time peer messaging, and leveraged Groq AI for resume and interview analysis. - Integrated 40k+ lines of learning data; enabled 250+ students to prepare for interviews with <100ms response time, reducing multi-platform switching and streamlining placement prep through a unified resource ecosystem.	April – June 2026
Call for All (Service Provider Marketplace) Tech Stack: React.js, Node.js, Express.js, MongoDB, Leaflet.js, Razorpay - Identified inefficiency in service discovery — customers struggle to find trusted electricians, plumbers, and carpenters; service providers lack centralized access to customer requests. - Developed a two-sided marketplace connecting customers and service providers with real-time location tracking, integrated payment, and granular work-status updates. - Implemented Leaflet.js for map-based provider discovery with filtering option; integrated Razorpay for secure payments; built dedicated admin panel for tracking all transactions, user activity, and service metrics. - Enabled 100+ customers and 50+ service providers to connect seamlessly; achieved 15% increase in service provider booking volume; deployed fully responsive dual-portal application.	Jan – May 2026

EXPERIENCE

Data Analytics Intern Deloitte - Initiated exploration of core data analytics domains including data visualization, A/B testing, and analytics engineering; building foundational expertise through hands-on work - Actively working with SQL and dashboards to analyze business metrics and support foundational analytics projects across various business domains	Ongoing
MERN Stack Development Intern Notasco Technologies India Pvt Ltd - Strengthened MERN fundamentals through hands-on study of React component patterns, Node.js asynchronous operations, and MongoDB data modeling - Engaged with the development team on full-stack best practices and learned real-world implementation strategies	Jun 11 th - Jun 25 th 2026

SKILLS

Languages: Java, JavaScript, C, C++, Python

Databases & Backend: MongoDB, SQL, REST APIs

Frameworks & Tools: React.js, Node.js, Express.js, FastAPI, Leaflet.js, Razorpay

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Design

Other: Git, GitHub, Linux
